

3D and Augmented Reality

3D and AR Companies based in the UK

The number of companies that provide stereoscopic 3D and augmented reality services in the UK remains small, but their potential impact on the education sector is enormous. The links to their websites demonstrates the potential of their services within the education sector. Click on the various company logos to find out more about each company.

Kudan is based in Bristol and specialises in producing mobile augmented reality solutions.

Blippar has generated a lot of interested since launching its Blippar mobile augmented reality app in 2011. The company main focus is AR advertising, but there is huge potential for their AR app within the education sector.
